²⁶ **2 I. Introduction**

²⁷ Before I begin the cases below, let me explain what and how this Kostovic Biotechnological Energetic Medical
²⁸ Laser Device, K-BTE works. The K-BTE Device is created in a proprietary method, we've assembled in a special
²⁹ circuitry 120volts of Dc/Ac/ Reverse(canceling the magnetic from the electric) which then is transferred through
³⁰ water. After deleting the magnetic aspect we extract the bio electrons from this water (electric fluid), controlling
³¹ their direction and strength(micro and nano amperes frequency). Lastly we add in extracted electrons enriched
³² with a number of natural acids. We incorporate these natural acids into our Biological Agents Device.

³³ Knowing the human body's resistance to the ground is 1,000 Ohms (dry) yet using 120 voltages of AC we
³⁴ very safely produce the gentle effect of 12-15 Micro Amperes (DC). By utilizing this newly discovered Reverse
³⁵ Current and separating electro from magnetic we easily prevent electromagnetic shock. Our K-BTE device
³⁶ utilizing these gentle Micro Amperes frequencies can effectively burn and disperse oxidized proteins from the
³⁷ body. This frequency is 10,000 times less in strength than today's developed laser technology. These energetic
³⁸ acupuncture type penetrations on the surface of the skin are soft, not at all an electric shock. It doesn't matter
³⁹ the human body's resistance to the ground is 1,000, or 100,000 or 1,000,000, wet or dry, it just doesn't matter
⁴⁰ anymore because we can produce such a low frequency of Micro Amperes and we have eliminated the magnetic
⁴¹ from the equation. We can even bring it down further to the Nano Amperes frequency which is 1 billionth of the
⁴² amplitude.

2 I. INTRODUCTION

43 The new invented laser medical device Kostovic Biotechnological Energizer, called K-BTE correlates to the
44 energetic fields that already exist in nature, but in more effective form. The mineral granite fields surrounded by
45 ice, caused by low temperature in nature, radiate strong elementary energy. The irradiated elementary energy
46 from mineral fields interacts with complex elementary biochemical energy charges from the sun's rays. It is well
47 known that these fields exist in the far regions of Earth.

48 For example, some of these extraordinary energy fields are found on the slopes of Himalayas. These areas
49 attract extremely powerful, complex and rich sun's ray elementary biochemical energy charges from nature and
50 can contribute to a longer lasting and healthier life. For this reason, some people in these areas live extended
51 lives, up to one hundred years or more and are not prone to most degenerative diseases.

52 Kostovic -Biotechnological Energizer, K-BTE medical laser device creates a powerful energetic vibration
53 through its field that is capable to attract these elementary biochemical charges and the electron neutrinos,
54 which are more effective, form than extraordinary fields on the Earth, as the slopes of Himalayas.

55 The durability of rudiment of cellular components is directly dependent on the attracted new elementary
56 biochemical charges and electron neutrinos. Released elementary biochemical charges and electron neutrinos are
57 the only ones in the form of the elemental energetic values. These are capable of nourishing and rebuilding
58 the cellular components into central nervous system. Enzyme proteins are enriched, and the oxidized proteins
59 are unmistakably "burned off". The rudiment of cellular components is consist of DNA, proteins and lipids as
60 chemical element. Its recovery depends exclusively on attracted elemental biochemical energetic values.

61 The Center has further continued research and development of the transfer of the different elementary energy
62 values from nature through hairs and skin (hairs are the offshoot of central nervous system), directly into the
63 cellular components of the brain. Due to the stimulation of the pineal gland in the brain, this process is visible
64 with the closed eyes.

65 On a daily basis our cells are always being born and dying. When we are young our bodies can disperse
66 and get rid of all the dead cells. We have cells that eat these dead oxidized proteins. But with aging the dead
67 cells are produced faster than the aging body can get rid of. When the oxygen and protein rich blood supply
68 is prevented from reaching and feeding the muscle fibers due to this build up of dead cells, then the nourishing
69 proteins become oxidized proteins.

70 These oxidized proteins become our number 1 enemy, as they attract parasites, microbes and bacterias etc. So
71 now the human body not only has dying fiber tissue, the building blocks of muscle tissue but we also have diseases
72 developing. If we are not able to clean this declining fiber tissue from the dead cells and oxidized proteins, then
73 the tissue will die, creating a domino like effect killing more and more fiber tissues, the building blocks of the
74 organs.

75 For the first time in history our discovery enables us to maintain the physical organs. We do this by first
76 cleansing the fiber tissues, burning away the dead cells and oxidized proteins with our wireless acupuncture
77 therapy. After we have burned away the dead cells and oxidized proteins making space for the healthy blood
78 supply to finally reach the fiber tissues, then body can rebuild healthy fiber tissue.

79 The K-BTE Medical Laser Device is always preformed in three phases which is why it is so highly efficient
80 in improving and healing the different types of neurological and physical disorders. As I have stated first we
81 wirelessly send biochemical electrical impulses into the diseased fiber tissue of injured areas to "burn off" the
82 oxidized proteins, unhealthy and malignant cells from the healthy cells, enabling the body to easily excrete them.

83 While wirelessly sending these photons of bio electrons through the patient's skin to burn away the diseased
84 areas, we are also burning away any plaque within the vascular system that is supplying this area. Thereby
85 eliminating clots in vascular system, enabling the injured and healthy cells to fully receive the healthy blood
86 supply of oxygen and proteins.

87 After we have cleansed the area with the bio electrical electricity, the second process is using the Biological
88 Agent Device. This Biological Agent Device releases sheaves of elementary laser beams of biological electricity
89 with enriched electrons. We enrich the electrons with biological and mineral agents such as gold, silver and
90 pyrite-Fe2 and converted amino acids. We use various natural acid liquids such as virgin olive oil, fig acid, and
91 lemon, etc., ("values of different energetic conductors") into an energetic form of enriched electrons. The virgin
92 olive oil contains natural acids, Oleic and Linoleic which are considered antioxidants, not saturated fats, like
93 polyphenol.

94 These ingredients are very important in the protection of healthy cells from destructible free radicals. We
95 biochemically charge these natural acids converting them into a light wrapping which surrounds the electrons.
96 Extracted from the H2O electric fluid and coated with the converted natural acids (light charged), these electrons
97 become bio electron photons which we are capable to absolutely control and direct into the patient's tissue,
98 nourishing and invigorating the healthy cells.

99 The final segment of this therapy, is very intricate. I have many documents on my website that delve into
100 greater detail. This Center has continued indepth research and development of the laser's transfer of the different
101 elementary energy values from nature through the hair and skin pores (hairs are the offshoots of the central
102 nervous system), directly into the cellular components of the brain. In this final segment the therapist touches
103 the client's forehead with his/her index fingers which stimulates the pineal gland in the brain, this laser process
104 is easily visible with the patients closed eyes.

105 The therapist transfers the biological electricity in the form of different energetic vibrations by pressing his/her

106 fingers on the patient's forehead, scalp and skin releasing this bio electric vibration which supplies throughout
107 the recently cleansed brain with more of the finest/slightest bio photon elemental energy.

108 This finest bio photon elemental energy interacts with the brain enabling/reflecting surplus weaker elemental
109 energy to irradiate out from the brain creating an aura of elemental energy. This aura around the outside of the
110 calvarium/skull becomes the catalyst for attracting more elemental biophoton particles of sunlight directly into
111 the brain. These elemental bio photon sunlight particles (which can't be seen with the naked eye) surrounds us
112 in nature and now for the first time in history we can attract and direct them. This surplus of weaker elemental
113 brain irradiation now circulating in an aura outside of the skull appears to the patient's open eyes as a wavy
114 blurry view. Our ability to attract these bio photon sunlight particles directly into the brain provokes/awakens
115 passive, dormant, hibernating brain nerve cells. As we awaken the passive/hibernating brain nerve cells we are
116 simultaneously nourishing and feeding any damaged and weaken areas thereby regenerating these harmed and
117 injured areas in the brain.

118 The healing process to the brain's nerve cells gradually become visible to the patient by this special way of
119 attracting elementary biochemical bio photon charges. With closed eyes the patient sees circles of many colors
120 including white, black, blue, green, red, rose, yellow, turquoise, purple, orange and gold as the body absorbs the
121 elementary biochemical bio photon charges awakening billions of hibernating passive brain nerve cells converting
122 them into newly activated brain nerve cells.

123 When dormant, passive brain nerve cells now become newly activated brain nerve cells, the brain can then
124 successfully combat the causes of most neurological disorders and traumatic brain injuries. Simultaneously, while
125 the newly activated brain nerve cells (the former passive, dormant brain nerve cells) are being strengthened and
126 invigorated they are now creating improvement in the neuronal functioning plus increasing neuronal production
127 and improving the various nerve impulses throughout the body.

128 The mobility and movements of the arms, legs, spine etc, reacquire their normal function, since the neuronal
129 activity has been repaired, the body is restored. The results are notable, the mitigation of immobility displays
130 the improvement for the patients suffering from this horrible disease. In their dormant form these passive brain
131 nerve cells are resistant and indestructible to all neurological illnesses. The passive brain nerve cells are slight and
132 very sensitive and contain faint energy charges which can only be stimulated/awakened by attracting to them
133 the finest elementary biochemical energy charges through this very slight form of energetic vibrations.

134 **3 II. ALS Treatment**

135 ALS (Amyotrophic Lateral Sclerosis) is a disorder of the motor neurons which are responsible for contracting
136 skeletal muscles. The body's organ muscles start to atrophy, loosing functionality and with some paralysis begins.
137 The varying degrees of this illness affect gradually two groups of motor neurons. One group of motor neurons
138 results in the immobility of the extremities and other in the form of paralysis in some organs. The characteristic
139 symptoms of ALS eventually appear as a weakened neuronal structure. ALS is most likely well established by
140 the time the patient first notices muscles weakness, shortness of breath, reduced ability to swallow, decreased
141 mobility etc. As we perform our Bio-electric surgery and therapy on ALS sufferers, releasing bio electron's
142 photons enriched with natural acids into the brain,. The damaged areas are easily revealed due to the fact that
143 the infected areas in the brain are quite painful when touched with our bio energetic acupuncture technique.
144 Using two agents, one from minerals such as gold, silver, or pyrite and the other from biological agents such as
145 lemons, fig acids and fish bones we simultaneously send the bio electron's photons enriched with these natural
146 acids into the brain. As they penetrate throughout the brain the unhealthy cells from the damaged areas begin
147 a "burning off" process enabling them now to be easily excreted from the body. The ALS damaged areas in the
148 brain are a source of aggressive "dying off" of active brain nerve cells. We are able to prevent this condition
149 from further neuronal deterioration and non functioning of motor impulses. Our results are a notable process
150 due to the mitigation of further immobility as well as paralysis. For some clients we can completely bring back
151 the body's normal functioning again.

152 Treatment plans for ALS patients are a minimum of one year with daily sessions of 50 minutes at least 6
153 days a week. Daily sessions could consist of more than one 50 minute treatment per day. Treatment plans are
154 determined by the severity of their condition. After the treatment plan has been completed it is necessary to
155 have a yearly follow up of at least one month. It is strongly recommended to have this yearly clean-up to refresh
156 those formerly affected weakened areas of the ALS. These patients who have had the bio-electric therapy benefit
157 greatly especially since it is also preventive to paralysis. The duration of recovery and improvement is long lasting
158 but follow-ups are imperative to keep those dead cells from piling up again. Though the enriched bio electron's
159 photons released has the capability of regaining neuronal motor impulses many wheelchair bound patients still
160 need to get physical therapy to rebuild those atrophied muscles so they can finally get out of the wheelchair.

161 **4 III. ALS Berbery Type Case**

162 The patient A. was diagnosed with ALS Berbery type in June 2001. He was seen by the top ALS expert at
163 UCLA in August 2001. The doctors informed the patient that his CO2 would measure 45 points within 6 months
164 which would cause suffocation. The doctor's predicted this progressive disease would end his life by January
165 2002. The UCLA doctors informed him that any technology for preventing the growth of the CO2 had not been

6 V. TREATMENT FOR ALZHEIMER'S

166 developed yet. Fortunately patient A. found our center. We stand alone in our technology since we are able to
167 clean his physical organs from CO₂, nerve's biochemical toxic gases, radioactive radiations, etc. Medical doctors
168 have yet to match our technology. Which is why the FDA has approved our laser medical device and given it a
169 classification of it's own.

170 UCLA offered the patient an experimental drug called Rilutek. The prescribed drug would somehow subside
171 suffocation, but the side effects would compromise his liver and kidney functions. The drug, with these side
172 effects, could not extend the patients life beyond 6 months which matched his CO₂ prognosis. Fortunately the
173 patient A declined the medication.

174 Patient A. suffered from ALS-Berberry type, beside the difficulty breathing and swallowing his symptoms
175 included falling down. Patient A. came to the Biotechnological Health Center January 13, 2002. Hopeless and
176 near death he was desperately looking for help. He had heard that I helped a patient suffering from ALS who's
177 mobility was restored after the K-BTE treatments. With this type of ALS-Berberry -CO₂ levels were at 43 points
178 which is extremely high for the lungs. As noted, this level of CO₂ would naturally increase and eventually
179 cause suffocation. Within 10 days of treatments his CO₂ was decreased by one point bringing it to 42. The
180 treatments were performed directly into the chest area simultaneously from front and the back. The patient
181 released by coughing up colorless, sticky layers of compressed mucous. By releasing these elementary laser's
182 beams of enriched bio electron's photons of the biological electricity into the skin and then into the blood vessels
183 in the lungs we started the process of cleaning. After 1 month of sessions his CO₂ decreased and his muscle
184 structure was strengthened. After 180 treatments the CO₂ was lowered to 28 which is normal, and it never
185 increased again. We also treated the throat area, strengthening the nodules on the vocal. By treating the neck
186 area his head was able to become straightened to its normal vertical position within one month. Arms and legs
187 were restored from atrophy and restored the existing areas from paralysis. After 18 months the patient's results
188 were notable, walking, laughing, speaking, swallowing, his entire metabolic condition improved. His life was
189 extended 8 years. But unfortunately, Patient A did not commit to the recommended follow-ups.

190 5 IV. Parkinson's Disease Case

191 Parkinson's disease affects the neurons that control the complex performance of body movements. Their decline
192 causes weakness and the patient experiences tremors in the arms and legs gradually becoming paralyzed.

193 Patient B. is a 80 year old man with Parkinson's Disease: The patient had tremors in both arms and his right
194 leg causing aggravated mobility. UCLA medical doctors prescribed a combination of levodopa and carbidopa
195 which is used to treat the symptoms of Parkinson's Disease. The drugs didn't help, and the UCLA doctors didn't
196 have any other technological healing options. The patient was not satisfied with the traditional treatment plan so
197 he sought treatment at The Biotechnological Health Center, Inc. His active brain nerve cells were strengthened by
198 the penetrating enriched bio electron's photons in the form of elementary needles of energetic acupuncture. The
199 passive brain nerve cells were awakened by the elemental biochemical charges of different energetic vibrations. We
200 successfully reversed his nerve damage and reversed the muscle damage. Patient B's arms and legs were restored
201 from tremors thus returning to his normal mobile function. His symptoms were completely eliminated confirming
202 our results as notable and worthy of attention from the medical community. The enriched bio electron's photons
203 of bio-electricity also renewed Patient B's weakened and sore knee tissues, bone and soft cartilage. Patient B's
204 testimony which was written after his recovery can be found on my website. In addition, his testimony was filmed
205 by Croatian National Television. Patient B. is first case in the world cured from Parkinson's diseases.

206 6 V. Treatment for Alzheimer's

207 Alzheimer's disease affects the memory and intelligence. Patients become unable to recognize the closest of
208 family members and their environment. Treatments plan is a minimum of 1 year, 6 days per week with 50 minute
209 sessions, we think double sessions each day can speed up the recovery time.

210 The damaged areas of the brain caused by Alzheimer's disease are treated as I explained earlier with striking
211 the skull with enriched bio electron's photons in the form of elementary needles of energetic acupuncture through
212 biological agents.

213 As noted, the bio photon energy wirelessly penetrates through the skin directly into the sickened areas deep
214 into the brain, targeting the sources of the illness. The biological electricity is enriched with amino acids of
215 Virgin olive oil etc which is converted into an energetic form of enriched bio electron's photons. These enriched
216 amino acids in the biological agents penetrate into the brain revealing the damaged brain areas, the sources of the
217 disease which we gently yet powerfully destroy. Modern science hasn't yet discovered the causes of Alzheimer's
218 disease as well as most neurological disorders, yet we can easily can find the exact damaged areas deep into the
219 brain, because they are painful. Directing these sheaves of enriched electrons into these painful areas we destroy
220 and excrete these unhealthy cells from the brain. We know improvements are made when the pain level had
221 decreased, neuronal functioning is restored and the patient reports that memory and intelligence has definitely
222 improved.

223 **7 VI. MS Disease Case**

224 Patient C. is a 33 years old female patient from Zagreb, Croatia. She suffered from an extremely progressive
225 type of multiple sclerosis. Her symptoms included lose of balance and falling down. After nineteen weeks of
226 treatments the patient was recovered to normal balance.

227 MS disorder is caused by inflammation of the myelin sheath which causes impairment and a decline of motor
228 neuron functioning. Gradually the muscular system becomes paralyzed, diminishing the patient's mobility. Using
229 the same technique of intensive therapy by the K-TBE laser medical device, releasing enriched bio electron's
230 photons into the body, the patient's legs and arms muscle impairment was reversed and mobility was restored. In
231 addition, the blood circulation returned to these areas and reflexes were restored and active. These improvements
232 were accomplished by regenerating active and awakening passive/hibernating brain nerve cells with the elemental
233 biochemical values. The damaged areas of the brain and spinal cord were struck with enriched bio electron's
234 photons of biological electricity. The sources of the MS disease were destroyed and dispersed without any negative
235 side effects. It is important to point out that in this case the painful spots were detected deep in the brain
236 confirming inflammation of the myelin sheath which caused the impairment of the spinal cord fluid from reaching
237 the brain. We completely reversed the nerve damage as well as we reversed the muscle weakness and patient C.
238 is a) The Patient C. is first case in the world cured from MS MS, Neuropathy and Dementia treatments take
239 approximately 6 months with 50 minutes sessions, 5 days a week. Intervals between device use is not necessary
240 or recommended. Regaining mobility with significant degrees of improvement and reversing muscle weakness is
241 unheard of. After our treatments are completed if a patient has been in a wheelchair for a while then physical
242 therapy is imperative to regain muscle strength in the atrophied muscles in order to walk without the wheelchair
243 or a cane. Duration of the restored health condition is long lasting with advised once a year follow up treatments.

244 On our website we have testimonials and medical records which will validate the results with substantial
245 scientific evidence. The K-BTE Medical Laser Device performs this bio-electric surgery and therapy providing
246 clinically significant improvement in patients illnesses based on significant and valid scientific evidence. While at
247 the same time, this device poses no risk of illness or injury to any healthy cells. This therapy is highly successful
248 in the recuperation from these diseases and offers significant mitigation of symptoms. Additionally, this advanced
249 technological discovery is an adjunct to early diagnosis of various illnesses. It is capable of detecting and revealing
250 painful areas in the brain or any other physical organ before they even show up on MRI's or CAT SCANS. The
251 K-BTE device keenly reveals the damaged areas affected with unhealthy cells. MRI's and other diagnostic
252 equipment are not always able to detect the early origin of many diseases, but we are able to penetrate and with
253 precision to locate the damaged unhealthy areas. After each treatment the pain immediately subsides. Once the
254 cleaning process is completed, the once affected areas with unhealthy cells is no longer painful and treatments
255 now start to feel comfortable. The duration of treatments for eliminating tumors and malignant cancers could
256 be from 2 to 6 months, we consider this as short term use. Neurological Disorders including some of the most
257 difficult cases are a minimum of 6 months to one year or more, we consider this long term use.

258 For patients with any recent surgical procedures we do not recommend having the K-BTE treatment. Although
259 the K-BTE device is capable of performing on open wounds and does help in speeding up the recovery time, we
260 restrict our treatment until the patient has recovered from their previous surgery.

261 According to official statistics, 60 million US citizens are suffering from 600 hundred different types of
262 neurological disorders. Utilizing the K-BTE device's bioelectric surgery and therapy we are capable of significantly
263 improving the cognitive functioning, memory and mobility of many of these neurological disorders.

264 The K-BTE medical laser device is extremely capable to mitigate many symptoms associated with these 600
265 different neurological diseases as well as eliminating a number of these disorders.

266 This KBTE Device can prevent diseases from developing, including neurological diseases, cancer, stroke and
267 heart disease as well as restore those afflicted with these diseases making their lives healthy, vital and longer
268 lasting.

269 The Kostovic Health Center has 17 years of research and studies of helping incapacitated ALS, Alzheimers
270 and MS patients regain the use of their limbs and no longer needing wheelchairs after only months of this unique
271 therapy. Some we completely healed but most of them we absolutely improved their health, which modern
272 science today is unable to do. Modern science attests to the fact that they might be able to slow down the
273 progression but have never improved their symptoms nor stopped the deterioration of motor skills and declining
274 brain functioning.
